 - Whats coming up ?
 - What are the worries and challenges ?
 - Another topic that would be interesting to talk about is the efforts that are made from our different organizations to **educate teachers, school leaders and owners of Christian schools**. We have heard fragments before from some countries, but it would be interesting if every organization's representative had prepared a 5 min presentation. I think that could be a great inspiration. I would also myself afterwards like to put together a list of these courses, because I think this is an area where we could (should?) cooperate much more.
 - Reflection to consideration
